

LEAF | HEATSAIL

A sculptural expression of shade, inspired by nature.

Meet the LEAF - a globally patented outdoor innovation that effortlessly combines comfort, technology, and design.

With a single touch, the LEAF opens and closes fully automatically, while your guests can remain comfortably seated. Forgot to close it? No worries. Thanks to smart vibration sensors, the LEAF detects strong winds and closes automatically for maximum safety. When open, it creates an impressive shade area measuring 4.6 x 3.6 meters, and thanks to the 360° rotation function, you'll always enjoy the perfect position relative to the sun and wind.

As night falls, the integrated lighting creates just the right atmosphere. Six subtly integrated light sources cast a warm, comfortable glow along the entire length of the LEAF. Using the built-in touch panel, you can easily adjust the lighting to your desired brightness—from soft, romantic dinner lighting to functional evening lighting.

Even on cooler evenings, it remains pleasant outside. The discreet far-infrared heating elements distribute a gentle, comfortable warmth evenly throughout the entire LEAF, ensuring everyone can enjoy it to the fullest. With various heat settings, you can adjust the temperature to suit the moment.

On hot summer days, you can easily activate the built-in misting system. Cleverly designed channels on both sides of the LEAF disperse an ultra-fine mist that can cool the surrounding air by up to 15°C. Thanks to the combination of microscopic openings and high pressure, the water evaporates instantly into the air—without leaving surfaces wet or causing hair to frizz. With the smartphone app, you can decide exactly when and how intensely you want to cool down.

The outdoor space is a place of tranquility, comfort, and connection—an inviting environment where fresh air and beautiful surroundings come together. But a true outdoor space isn't complete without the right shelter. Without protection from the bright sun or unexpected rain, people often choose to use their patio or garden less often.

That's exactly where the LEAF excels. This innovative outdoor solution creates a comfortable living space in every season. The LEAF protects against sun, wind, and rain, provides warmth when it gets chilly, cools you down on hot days, and offers atmospheric lighting in the evening - all integrated into a single elegant design.

With its iconic, leaf-inspired design, the LEAF blends effortlessly into any architectural setting. Timeless, stylish, and designed for the future, it transforms any outdoor space into a luxurious outdoor living room where comfort and design come together perfectly.

DESIGNED TO LAST FOR EVERY SEASON

The LEAF collection is designed for heavy-duty outdoor use and crafted from high-quality materials such as aluminum and stainless steel. Thanks to this durable finish, LEAF is fully weatherproof and built to withstand all seasons. The included cover can be used in winter or during heavy rain.

ENERGY-EFFICIENT & FULLY ELECTRIC

The LEAF combines luxurious comfort with a commitment to sustainability. Its all-electric powertrain emits zero CO₂ and operates with exceptional efficiency, consuming as little as 3.12 kWh of energy—quiet, powerful, and eco-friendly.

MINIMAL EFFORT, MAXIMUM COMFORT

Thanks to the use of high-quality ceramic heating elements and premium materials, the LEAF collection is virtually maintenance-free. This means you can enjoy years of worry-free outdoor comfort with minimal effort.

POWERFUL HEAT, WITHOUT AN INCONVENIENT GLOW

The built-in far-infrared heating system provides a comfortable range of warmth. The heat is distributed evenly without a distracting red glow, making LEAF ideal for cozy dinners and long evenings at the table with 8 to 10 people.
